Professional Summary

Senior Technical Writer with 7+ years of experience developing technical documentation, online help systems, release notes, and training content for Telecom, Utilities, and Enterprise Software products. Skilled in DITA, MadCap Flare, and AI-assisted documentation solutions, with a focus on delivering clear, user-centric content.

Key Achievements

- Developed an AI-assisted solution for generating Release Notes, improving documentation efficiency and consistency.
- Created a proof-of-concept AI-assisted storyboarding solution to streamline eLearning content development.
- Established and standardized documentation processes for multi-team projects, improving collaboration and content delivery.
- Delivered training sessions on DITA, Azure DevOps, GitLab, and SourceTree to internal teams.
- Contributed to customer-facing documentation initiatives for enterprise customers including Cisco and Verizon.
- Revamped customer documentation portals to improve content accessibility and user experience.

Professional Experience

Sep 2022 – Present, Landis+Gyr, Noida as a Senior Technical Writer

- Created Install Guides, User Guides, Release Notes, and Online Help for RF Mesh, Mesh IP, and MDM technologies.
- Built modular, reusable topics aligned to DITA and MSTP for multi-audience consumption, such as field engineers, admins, and end users.
- Developed an AI-assisted solution for generating Release Notes across products.
- Standardized documentation processes and trained SMEs on documentation workflows.
- Created storyboards and eLearning modules using Captivate and Camtasia.
- Proposed centralized cloud storage for documentation to simplify version control across products.

Oct 2020 - Sep 2022, guavus, a Thales Company, Gurugram as a Senior Technical Writer

- Provided business solutions such as 5G-IQ NWDAF, Service-IQ Device Management Analytics, and so on for Mobile Network Operators through documentation.
- Created the first cloud-based (AWS) documentation for the new projects such as 5G-IQNWDAF and Service-IQ Device Management Analytics.
- Created technical documents such as Install Guide, Operations and troubleshooting Guide, User Guide, and Online Help using Madcap Flare for products in the Telecom domain that uses AI/ML for on-premises or cloud platform deployment.

- Collaborated with multiple Dev and QA teams for various projects.
- Edited flare CSS files to improve the HTML output.
- Understands few AWS concepts, basics of Linux commands, and Ansible.
- Used Gitlab as Version Control System.
- Created short videos through Adobe After Effects as an Ad hoc task.
- Worked with live customers such as Cisco and Verizon to design the documents as per their requirements.
- Revamped Customer Success portal (Zendesk) for customer usage.

Feb 2019 - Sep 2020, sa.global, Bengaluru as a Technical Writer
